DIVISION OF
OIL GAS & MINING

Dear Mr. Holden:

Your notice to conduct mining related operations on mining claims, UMC serial numbers, 131057 -131061 located in W 1/2, Sec. 17, T. 11 S., R. 5 W., SLM was received on September 14, 1992, and has been accepted by this office. Your notice has been assigned case file number UT-054-92-23N. Please use this number in any future correspondence concerning this notice. Your previous notice for mining related operations, serial number UT-054-91-20N has been administratively closed and combined into this notice.

If you change your operation from what is described in your notice, please contact this office prior to the change. If your operations extend for more than one year, please advise this office of the status of your mining related activity on the anniversary date of your notice.

Enclosed is a copy of the Standard Operating Procedures required by the Richfield District, House Range Resource Area. Please follow these guidelines as they pertain to your operation.

The operator should immediately notify this office if any cultural, archaeological, paleontological, or other historical remains or objects are discovered during operations. Such discoveries should be left intact until approval to proceed is given by the Authorized Officer.

Thank you for including on your map the boundary for the Wolf private property near your claims. Our acceptance of your notice is only effective in so far as BLM administered lands are involved. If you are not the land owner of the adjacent parcels of private land, we recommend that you obtain permission from adjacent land owners before you begin your operations.

A copy of your notice has been sent to the Utah Division of Oil, Gas and Mining (DOGM); therefore, you will not have to file this notice with DOGM. All mining claimants and operators that plan to use, store or divert water are required by Utah statute to notify the Utah Department of Environmental Quality, Division of Water Quality. Prior to the commencement of the proposed

0001

activity, all appropriate State water quality permits must be obtained from the Utah Department of Environmental Quality, Division of Water Quality, located at:

1636 West North Temple
Salt Lake City, Utah 84116-3156

As required by 43 CFR 3809, Surface Management Regulations, reasonable measures must be taken to prevent unnecessary or undue degradation of public lands during your operations. Please notify this office upon completion of operations and reclamation, so an inspection may be conducted on the site. Reclamation under this notice is required to conform to the standards of the Utah Mined Land Reclamation Act.

We appreciate your concern and information about the motorcycle race in the area. We are currently looking into the matter.

Acceptance of your notice will not now, nor in the future, serve as a determination of the validity nor ownership of any mining claim included under your notice.

Prior to the commencement of your operations we would like to meet with you on site to review reclamation practices and initiate a reclamation plan. You stated in your letter that an early November meeting would be more convenient for you. We will be happy to meet with you at that time. Please contact this office to make the specific arrangements. If you have any questions regarding this letter, please feel free to contact Christina Reid at (801) 743-6811. Thank you for submitting your notice.

Sincerely,

Rex Rowley
Area Manager

ACTING
